STEM Division**

CHEM 2010: Organic Chemistry I

2018 Master Course Syllabus

(RUBRIC Number – Title)

(This master course syllabus template is a general guide for providing an overview of each course offered at Nashville State. Each instructor will further clarify specific criteria for grading, classroom procedures, attendance, exams and dates, etc. on his/her individual course syllabus. Prompts for individual adaptations are italicized and in parentheses; faculty should remove or replace these prompts when creating master syllabi and their own individual syllabi if they have not been removed previously.)

Course Information:

Course Title: Organic Chemistry I

Credits: 4 credits

Class Hours: 3 class hours, 3 lab hours

Course Description:

A study of the chemical and physical properties of hydrocarbons and their derivatives. Topics include

(1) structure and bonding of organic compounds, (2) acid/base chemistry, (3) properties of alkanes, alkenes, alkynes, alkyl halides, and alcohols and (4) an introduction to spectroscopy. Reaction mechanisms are emphasized. The laboratory component stresses skills in techniques such as purification and characterization of organic compounds. Some synthesis is performed.

Credit: 4 credits, 3 class hours, 3 lab hours

Prerequisite: CHEM 1120

Instructor Information:

Name:

Email:

Office Phone:

Office Location:

Office Hours:

Required Textbook(s) & Other Materials:

- *Organic Chemistry (with ConnectPlus access code)*, 5th edition by Smith (Publisher: McGraw-Hill, ISBN 007774647) - or –
- *ConnectPlus access code w/ Organic Chemistry ebook*, 5th edition by Smith (Publisher: McGraw-Hill, ISBN 0077479793)
- Laboratory Notebook (bound, composition-style)

Reference Materials:

Supplies: A scientific calculator

[No electronic, internet capable devices are allowed on exams (i.e. no cell phone calculators)]

Once enrolled, all students should verify that they have the correct textbook and materials information by consulting the D2L/NS Online shell for the course. If you are registered with the Access Center and require an alternate format for the textbook and other course materials, please contact the Access Center at 615-353-3721, 615-353-3741, or accesscenter@nsc.edu.

Course Outcomes:

Upon successful completion of this course, students should be able to:

1. Understand the principles of atomic structure, molecular geometry, hybrid orbitals, resonance, polarity, and conformation stability.
2. Identify important functional groups, apply IUPAC guidelines for naming organic molecules, describe stereochemistry of organic molecules, and categorize isomeric compounds as constitutional isomers, enantiomers or diastereomers.
3. Interpret reactions using energy diagrams and mechanisms and describe reaction kinetic and thermodynamic properties.
4. Describe the reactivity of organic compounds by their ability to act as a Lewis acid/base or electrophile/nucleophile; recognize the three fundamental reactions of organic chemistry (substitution, elimination, and addition) and predict the chemical behavior of hydrocarbons, alkyl halides, and alcohols.
5. Characterize organic molecules using physical properties, Mass Spectrometry and Infrared Spectroscopy.

Course topics:

- Atomic Structure
- Hybridization & bonding
- Resonance
- Polarity
- Isomers
- Conformations
- Drawing organic molecules.
- Acid Strength

- Chemistry of Lewis acids/bases
- Functional groups
- Physical properties of organic molecules
- Nomenclature
- Energy diagrams
- Kinetics
- Thermodynamics
- Stereochemistry
- Alkanes
- Alkyl halides
- Alkenes
- Alkynes
- Alcohols
- Nucleophilic substitution reactions
- Elimination reactions
- Addition reactions
- Oxidation/Reduction reactions
- Reaction mechanisms
- Characterization of organic compounds by physical properties..
- Purification of organic compounds by recrystallization, separation, distillation, chromatography.

Course Assessments:

The expected outcomes for the course may be assessed by various techniques including in-class assignments/activities, online homework, in-class or online quizzes, exams and a comprehensive final examination as well as lab related activities.

The following performance assessments will be used:

Three to Four Exams	33%
Final Exam	22%
Laboratory work	20%
Homework	15%

Quizzes/Discussion

10%

Grading Policy:

* Lowest grade in each category is dropped before calculating component grade.

** The final exam score contributes twice as much as a test, but the lowest overall test score is dropped.

If you believe you need an accommodation (ADA or early exam), I need 1 weeks' notice *via* e-mail. ***

Late Work Policy & Make-up Procedures for Missed Assignments and Work:

(Each instructor will provide policy)

Attendance Policy

Students are expected to attend all scheduled classes and laboratories. Absences in a course may affect a student's final grade. The student is responsible for all assigned work in the course regardless of excused or unexcused absences. Tardiness may also affect a student's final grade.

In online courses, attendance is signaled by logging on to the D2L/NS Online shell, participating as prompted (e.g., responding to an instructor's email, posting to a discussion board) and/or completing and submitting assignments. Campus closures do not affect attendance and assignment completion in online courses.

(Each instructor will provide policy, especially how attendance influences student assessment and grading.)

Grading Scale:

Letter Grade	Percentage Range
A	90-100
B	80-89
C	70-79
D	60-69
F	Below 60

FA

According to NSCC policy, if a student fails a course, but has not officially withdrawn from the course, and her/his last date of attendance is before the last date to withdraw (*use date appropriate to your section*), the student will receive a grade of FA (i.e., "Failure for Attendance Reasons").

(While the above statement should appear in all syllabi, faculty are encouraged to make additional statements or provide examples that would clarify the policy for students.)

FN

An FN is awarded to students who never attended class.

Technology Statement

Nashville State's classes are considered to be web-enhanced. Faculty have an expectation that students will use a computer and the Internet to complete assignments, engage in online discussions, and access various course materials through D2L/NS Online course shells. Computers are available for student use at each campus during campus open hours.

D2L/NSOnline and myNSCC

It is students' responsibility to check D2L/NS Online course shells for all enrolled courses and myNSCC, including student email, on a regular basis. These are the official communication channels between the college and students, who are responsible for the information communicated through those channels. D2L/NS Online contains specific course information and myNSCC contains information important for other purposes.

ADA Compliance Statement

Nashville State complies with the Americans with Disabilities Act (ADA). If you require accommodations for any courses in which you are enrolled, contact the Access Center at 615.353.3741 or 615.353.3721, or e-mail accesscenter@nsc.edu. If you are registered with the Access Center and require an alternate format for the textbook and other course materials, please contact the Access Center.

Classroom Misconduct

Nashville State Community College has a zero-tolerance policy for disruptive conduct in the classroom. Students whose behavior disrupts the classroom will be subject to disciplinary measures. Please review the [Nashville State Student Code of Conduct policy](#). Please be aware that children are not allowed in class or to be left unattended on campus.

Academic Misconduct

Any form of academic dishonesty, cheating, plagiarizing, or other academic misconduct is prohibited. Students are responsible for understanding and abiding by the [Academic Misconduct Policy](#) in the Nashville State Student Code of Conduct. In addition to other possible disciplinary measures that may be applied through regular college procedures as a result of academic dishonesty, the instructor has the authority to assign an "F" or a "zero" for the exercise, paper, or examination, or to assign an "F" for the course. Students may appeal through the appropriate college grade appeal procedures.

(Each instructor will outline his/her expectations for academic integrity and provide individualized information about consequences for academic misconduct.)

Academic Early Alert System

Nashville State Community College uses an Early Alert System to let students know of a faculty member's concern in one or more of these academic areas: lack of attendance, lack of classroom participation, late or missing assignments, and/or poor performance on assignments/tests. *Please note that Early Alerts do not affect a student's academic standing. If you receive an Early Alert email, please see your instructor and your academic advisor as soon as possible.

RAVE Emergency Alert System

Emergency events can happen at any time and Nashville State Community College wants to be able to notify students if and when they occur. For this reason, all students have been enrolled in the free RAVE alert system. If you have not already done so, please log in at <https://www.getrave.com/login/nsc> to confirm and update your contact information and notification preferences. It is critical that your information be correct so that you will receive any emergency notifications. Your RAVE Username is your NSCC email address. If you've never received an email from RAVE with your password, or if you need to reset your password, select "Forgot your password?" and a new password will be emailed to you. Should the RAVE system indicate "user not found", select Register and create your own RAVE account.

Inclement Weather & Campus Closings

Nashville State will use the RAVE alert system to send a text message to students, staff, and faculty about adjusted hours of operation and/or closings at individual campuses. All students should check the Nashville State web site home page at www.nsc.edu for announcements on campus closures, which may vary from campus to campus. Campus closures will also be announced on local television stations. Students should use their own best judgment in determining whether to report to campus during inclement weather when classes are not cancelled.

Even when campuses are closed, students are still responsible for completing all assigned work. When classes are cancelled, faculty will post online assignments and any additional instructions in the D2L/NS Online course shell. Check D2L/NS Online for a message from your instructor regarding your online assignment requirements. Faculty have discretion over adjusting deadlines or due date for assignments, but students are responsible for completing all assigned work by the due date established by the instructor.

Class Cancellation Policy

If the class is cancelled, the instructor will notify all students by posting in the D2L/NS Online course, e-mailing through D2L/NS Online, and/or by posting a sign on the classroom door. In the event of class cancellation, students must access D2L/NS Online to complete classwork and the assignment that will be posted in the course D2L site.
