ISBN: 978-0-07-329073-7

COURSE RATIONALE:

The course will survey the geographic regions of the world, including studies of the physical character of the land, resources, economics, and cultures. We will study especially those with problems or situations of contemporary interest, to illustrate geographical points of view. Courses are designed to provide general background in world geography.

The course will examine the regions of the world to understand their character and problems. A special focus will rest on major world issues and important national powers. This is the first or second of two semesters of an introductory course in world geography, a global overview of places, peoples and world problems and issues. In two semesters you will see the entire earth from the perspective of the "big picture". A brief overview is taken of each major region. No attempt is made to study any single area comprehensively. You will be able to see other cultures in better light and gain a world wide multicultural perspective. In sum, you will have a global perspective and understanding of our World.

COURSE AUDIENCE:

This is designed as freshman and sophomore level course for History and Geography majors. However, it is open to all students at any level to meet other requirements or as an elective.
METHOD OF INSTRUCTION:

There will be a combination of lectures, guided discussions and participatory learning opportunities. Students must participate in all learning aspects of the course. In particular, students are expected to communicate by e-mail with other students on any geographical and historical topic or current theme.

Please keep abreast of current events, use the library and Internet sources for research.

Please learn to read, outline and prepare for discussion prior to class. Your reading assignments should be completed before class for maximum benefit. Please keep up with your reading!

ATTENDANCE:

All tests (Quizzes, Assignments, Map Quizzes, and the Final Exam) must be submitted by the date assigned or they will be graded as “0” or “F”. To fail to be on line may mean that you will miss a key theme that would prove harmful to your understanding and performance in the course.
