

Nashville State Community College
Division Name: Science, Technology, Engineering and Math
Program Name: Mathematics

2018 Master Course Syllabus

Math 1130, College Algebra (web course)

Course Information: Math 1130 (web course)

Course Title: College Algebra

Credits: 3

Class Hours: 3

Course Description: A traditional college algebra course for non-science majors. Topics include rational and exponential expressions, the concept of functions and their inverses, linear functions and equations including equations with radicals and absolute values, quadratic functions and equations, exponential and logarithmic functions and equations, graphs of basic functions, systems of equations, and inequalities. Prerequisite(s): Initial Level 2 placement or higher in Math or MATH 1000.

Instructor Information:

Name:

Email:

Office Phone:

Office Location:

Office Hours:

Required Textbook(s) & Other Materials:

These materials are required by the end of the first day of class:

The following Materials are available from the Nashville State Bookstore. (The access code for MyMathLab (MML) can also be purchased online using a credit card at <http://pearsonmylabandmastering.com> (if any of the course materials are purchased online, the delivery should be "next day" delivery).

Required: MyMathLab/MyStatLab Student Access Kit, ISBN 9780134757926 (Access code can be purchased online at <http://pearsonmylabandmastering.com>). There is a link to the page with MyMathLab enrollment instructions on the Content page.

ISBNs for and other information about optional course materials are included below.

Optional: package College Algebra, 7th edition by Blitzer (textbook, MyMathLab Access, student solution manual): Publisher Pearson, ISBN 9780134754734. The textbook is optional because the entire 7th edition of the textbook is online in MyMathLab. Students who like to underline and write in a book may want a hard copy. To order this book, a student will need to do an internet search and order it online.

Optional: Text only: College Algebra, 7th edition, by Blitzer; Publisher: Pearson: ISBN 9780134469164

Reference Materials: Optional resource: Student Solutions Manual only, ISBN 9780134469270. (This will be needed if a student decides to use the textbook exercises for drill and practice and to better understand the material. The MML homework exercise sets are the graded exercise sets.

Supplies (Required) TI-83 or 84 Plus Calculator (The TI-83/TI-84+ graphing calculator is required and used extensively in this course.) For a quick reference to all of the calculator functions that will be used, students are required to print out the TI-83/TI-84+ Plus Graphing Calculator Reference Card that can be accessed from a link under Resources on the Content page.

Once enrolled, all students should verify that they have the correct textbook and materials information by consulting the D2L/NS Online shell for the course. If you are registered with the Access Center and require an alternate format for the textbook and other course materials, please contact the Access Center at 615-353-3721, 615-353-3741, or accesscenter@nsc.edu.

Course Outcomes:

Upon successful completion of this course, students should be able to:

- Solve problems using mathematics, and determine if solutions are reasonable.
Solve rational, radical, absolute value, and logarithmic equations and determine if the solution is reasonable. Solve linear inequalities and determine if the solution is reasonable.
- Apply mathematical concepts to solve real-life problems using formulas (deduction) and interpret the meaning of the solution.
Create, analyze, and interpret the results of linear and exponential functions.
- Construct meaningful connections (transfer of knowledge) between mathematics and other disciplines.
- Apply technology for mathematical reasoning and problem solving.
Solve real-world problems by applying mathematical models using exponential and logarithmic functions.
- Analyze data/graphs by using mathematical modeling and/or statistical reasoning.
Use appropriate technology to solve equations and systems of equations graphically, and determine increasing and decreasing intervals of functions.

Topics to Be Covered:

Algebraic expressions, mathematical models, real numbers; Exponents, scientific notation; Radicals and rational exponents; Polynomials; Factoring Polynomials; Rational expressions; Graphs and graphing utilities; Linear equations and rational equations; Models and applications; Complex numbers; Quadratic equations; Other types of equations (radical, rational); Linear inequalities, absolute value inequalities; Basics of functions and their graphs; More on functions and their graphs; Linear functions and slope; More on slope; Combinations of functions, composite functions; Inverse functions; Distance and midpoint formulas; Quadratic functions; Polynomial functions and their graphs; Dividing polynomials; remainder and factor theorems; Zeros of polynomial functions; Polynomial inequalities; Exponential functions; Logarithmic functions; Properties of logarithms; Exponential and logarithmic equations; Exponential Growth and Decay; Systems of linear equations in two variables; Systems of nonlinear equations in two variables

Course Assessments:

The following performance assessments will be used to demonstrate students' understanding, knowledge, and skills:

Homework, Discussion, and Testing Policies

All information about homework, discussions, and tests are accessed under "Assignments (Instructions and Schedules)" on the Content page. Each student must read all of the pages and will be responsible for fulfilling all requirements and assignments. There are some strict deadlines.

Other PROCEDURES and POLICIES

Students are responsible for knowing the information in this syllabus and on all pages posted on the Web pages for this course. The initial attendance email from each student should verify that all pages have been examined.

Students are expected to view the video lectures, complete the assigned problems and discussions and submit them on or before the due dates. Tests must be taken by the dates on the course outline sheet and schedule page.

Netiquette rules (see content page) must be observed in all email messages, discussions, and online communications.

Handouts, Schedules, and Modules

A section on the Content Page contains a list of handouts for some of the course content that might be helpful. There are no assignments contained in the handouts.

On the Content Page, see the section, "Assignments, Instructions and Schedules" for the due dates for homework, tests, and discussions.

Module 1, Module 2, Module 3, on the Content Page give the instructions for completing the course materials.

COURSE REQUIREMENTS

Report Course Progress to your instructor by submitting assignments. Attendance will be taken by completing homework assignments.

Complete homework assignments for each course section. The homework is accessed by selecting "Homework" on the navigation bar after login to MyMathLab. A few access days are provided after the due date. A score of zero will be recorded after the last access day. See Homework link under Assignments, Instructions and Schedule on the Content page.

Have a final average of 60 or more

Complete three module tests and a comprehensive final exam

Send an email to the instructor by the end of the first day of classes and Discussion 1 by the end of the first week. The email should indicate that every page in the content has been opened, examined, and understood.

Post responses to the four discussions.

Students must learn to use the graphing calculator for computations and solving equations. These type exercises will be on the tests. Study the tutorials provided via links on the Content page.

Grading Policy:

Do not make a request for extra credit. There are no provisions for extra credit in this course. Each student will receive a grade for the course based on the exact same criteria as outlined below. Grades for this course will be based on unit tests, homework, final exam and discussions as follows:

Discussions (Introduce Yourself, Summary and Reflections)--10%

Homework--20%

Proctored tests-50% (review for each test will count as 20% of each test and it can be taken as many times)

Proctored Final Exam (comprehensive)-20%

No extra credit assignments are provided.

*The proctored exams must be taken at a testing center at one of NSCC's Campus sites for that a password can be entered by testing center personnel.

Late Work Policy & Make-up Procedures for Missed Assignments and Work:

Each instructor will provide policy.

Attendance Policy

Students are expected to attend all scheduled classes and laboratories. Absences in a course may affect a student's final grade. The student is responsible for all assigned work in the course regardless of excused or unexcused absences. Tardiness may also affect a student's final grade.

In online courses, attendance is signaled by logging on to the D2L/NS Online shell, participating as prompted (e.g., responding to an instructor's email, posting to a discussion board) and/or completing

and submitting assignments. Campus closures do not affect attendance and assignment completion in online courses.

Grading Scale:

Letter Grade	Percent Range
A	90 to 100
B	80 to 89
C	70 to 79
D	60 to 69
F	0 to 59

FA

According to NSCC policy, if a student fails a course, but has not officially withdrawn from the course, and her/his last date of attendance is before the last date to withdraw (*use date appropriate to your section*), the student will receive a grade of FA (i.e., “Failure for Attendance Reasons”). *Each instructor will make additional statements or provide examples that would clarify the policy for students.*

FN

An FN is awarded to students who never attended class.

Technology Statement

Nashville State's classes are considered to be web-enhanced. Faculty have an expectation that students will use a computer and the Internet to complete assignments, engage in online discussions, and access various course materials through D2L/NS Online course shells. Computers are available for student use at each campus during campus open hours.

D2L/NS Online and myNSCC

It is students’ responsibility to check D2L/NS Online course shells for all enrolled courses and myNSCC, including student email, on a regular basis. These are the official communication channels between the college and students, who are responsible for the information communicated through those channels. D2L/NS Online contains specific course information and myNSCC contains information important for other purposes.

ADA Compliance Statement

Nashville State complies with the Americans with Disabilities Act (ADA). If you require accommodations for any courses in which you are enrolled, contact the Access Center at 615.353.3741 or 615.353.3721, or e-mail accesscenter@nsc.edu. If you are registered with the Access Center and require an alternate format for the textbook and other course materials, please contact the Access Center.

Classroom Misconduct

Nashville State Community College has a zero-tolerance policy for disruptive conduct in the classroom. Students whose behavior disrupts the classroom will be subject to disciplinary measures. Please review the [Nashville State Student Code of Conduct policy](#). Please be aware that children are not allowed in class or to be left unattended on campus.

Academic Misconduct

Any form of academic dishonesty, cheating, plagiarizing, or other academic misconduct is prohibited. Students are responsible for understanding and abiding by the [Academic Misconduct Policy](#) in the Nashville State Student Code of Conduct. In addition to other possible disciplinary measures that may be applied through regular college procedures as a result of academic dishonesty, the instructor has the authority to assign an "F" or a "zero" for the exercise, paper, or examination, or to assign an "F" for the course. Students may appeal through the appropriate college grade appeal procedures.

Each instructor will outline his/her expectations for academic integrity and provide individualized information about consequences for academic misconduct.

Academic Early Alert System

Nashville State Community College uses an Early Alert System to let students know of a faculty member's concern in one or more of these academic areas: lack of attendance, lack of classroom participation, late or missing assignments, and/or poor performance on assignments/tests. *Please note that Early Alerts do not affect a student's academic standing. If you receive an Early Alert email, please see your instructor and your academic advisor as soon as possible.

RAVE Emergency Alert System

Emergency events can happen at any time and Nashville State Community College wants to be able to notify students if and when they occur. For this reason, all students have been enrolled in the free RAVE alert system. If you have not already done so, please log in at <https://www.getrave.com/login/nscc> to confirm and update your contact information and notification preferences. It is critical that your information be correct so that you will receive any emergency notifications. Your RAVE Username is your NSCC email address. If you've never received an email from RAVE with your password, or if you need to reset your password, select "Forgot your password?" and a new password will be emailed to you. Should the RAVE system indicate "user not found", select Register and create your own RAVE account.

Inclement Weather & Campus Closings

Nashville State will use the RAVE alert system to send a text message to students, staff, and faculty about adjusted hours of operation and/or closings at individual campuses. All students should check the Nashville State web site home page at www.nsc.edu for announcements on campus closures, which may vary from campus to campus. Campus closures will also be announced on local television stations. Students should use their own best judgment in determining whether to report to campus during inclement weather when classes are not cancelled.

Even when campuses are closed, students are still responsible for completing all assigned work. When classes are cancelled, faculty will post online assignments and any additional instructions in the D2L/NS Online course shell. Check D2L/NS Online for a message from your instructor regarding your online assignment requirements. Faculty have discretion over adjusting deadlines or due date for assignments, but students are responsible for completing all assigned work by the due date established by the instructor.

Class Cancellation Policy

If the class is cancelled, the instructor will notify all students by posting in the D2L/NS Online course, e-mailing through D2L/NS Online, and/or by posting a sign on the classroom door. In the event of class

cancellation, students must access D2L/NS Online to complete classwork and the assignment that will be posted in the course D2L site.
