COURSE SYLLABUS

Syllabus for: MECH 1100 Electrical Components

Former Course(s): none

Catalog Description: This course is a study of the basic electrical components in a mechatronic system. Topics covered will include basic functions and physical properties of electrical components; the systematic flow of energy and measurement of components; troubleshooting techniques and strategies to identify, localize and correct malfunctions; and systematic preventive maintenance and electrical component safety. Technical documentation such as data sheets, schematics, timing diagrams and system specifications will also be covered.

Credit Hours: 4 Contact Hours: 5 Lab Hours: 2

Prerequisite(s): None

Required Supplies/Material(s): calculator

Recommended Supplementary Material(s): handouts as appropriate

Student Group for Whom Course is Required/Intended: This course is intended for students pursuing the following degrees and programs of study.

Certificate: Mechatronics

Associate of Applied Science: Mechatronics Technology

Student Learning Outcomes: Upon completion of this course, students will demonstrate the ability to:

1. Show knowledge of the historical development of what comprises a mechatronic system or module.

2. Understand and apply electric safety rules while working on a mechatronic system.

3. Develop an understanding of the specific roles of various electrical components within a given system or module.

4. Analyze basic circuits using Ohm’s law, Kirchhoff’s laws and Watts law.
Course Syllabus: MECH 1100

Student Learning Outcomes (continued)

5. Analyze effectively series and parallel electrical circuits.

6. Know and explain physical operation of electromagnetic and electrostatic components such as coils, solenoids, relays, and various sensors used in a mechatronic system.

7. Understand and explain the basic physical properties of electrical components such as resistors, capacitors, diodes, transformers, relays, and power supplies.

8. Read, analyze and utilize the technical documents such as data sheets, timing diagrams, operation manuals, and schematics for a mechatronic system.

9. Take operative measurements on electrical components in a mechatronic system and understand how to interpret the results.

10. Effectively troubleshoot malfunctions in electrical components, based upon the technical documentation.

11. Understand how to trace and describe the flow of electrical energy in a mechatronic system.

Suggested Evaluation Plan:

<table>
<thead>
<tr>
<th>Task</th>
<th>Weight</th>
<th>Student Learning Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mid Term Exam</td>
<td>25%</td>
<td>1-8</td>
</tr>
<tr>
<td>Final Exam</td>
<td>25%</td>
<td>3-11</td>
</tr>
<tr>
<td>Quizzes (qty 4)</td>
<td>25%</td>
<td>1-11</td>
</tr>
<tr>
<td>Lab work</td>
<td>25%</td>
<td>1-11</td>
</tr>
</tbody>
</table>

Final Grading Plan: The grading scale for all examinations and the final course grade will be based on the following percentages:

- A = 90 - 100%
- B = 80 - 89%
- C = 70 - 79%
- D = 60 - 69%
- F = 0 - 59%
### Course Syllabus: MECH 1100

**Instructional Schedule:**

<table>
<thead>
<tr>
<th>week</th>
<th>Student learning outcomes</th>
<th>Content to be covered</th>
<th>Student Assignments/Supplementary Material</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>1</td>
<td>History of mechatronics and the understanding of the system approach. Review complete mechatronics system, PLC controls, wiring, electrical elements, pneumatics, and mechanical elements</td>
<td>Chapter 1, 2 Handout on mechatronics and system philosophy Overview of mechatronics trainer.</td>
</tr>
<tr>
<td>2</td>
<td>1,2,3,4</td>
<td>Basic electrical fundamentals and applications. Study ohms law Basic troubleshooting strategy Circuit diagrams Electrical safety Quiz 1</td>
<td>Chapter 2 and 3 Section checkup questions Study Circuit diagrams Overall electronics application in mechatronic system Lockout/tag out application</td>
</tr>
<tr>
<td>3</td>
<td>4,5</td>
<td>Electrical fundamentals and applications. Series and parallel circuit study. Kirchhoff’s law. Basic troubleshooting strategy Introduction to instrumentation</td>
<td>Chapter 4 Section checkup questions Continue circuit diagrams study</td>
</tr>
<tr>
<td>4</td>
<td>4,5</td>
<td>Electrical Fundamentals parallel circuits, Wheatstone bridge and balancing bridges Troubleshooting parallel circuitry Circuit diagrams Introduce Reed switches</td>
<td>Chapter 5 sections 1-5 Section checkup questions Application of reed switches in the system. Troubleshooting reed switches in the mechatronic system</td>
</tr>
<tr>
<td>5</td>
<td>4,5</td>
<td>Electrical Fundamentals Current dividers and parallel circuitry. Troubleshooting parallel circuits Introduce relays Quiz 2</td>
<td>Chapter 5 sections 6 -8 Section checkup questions Application of relays and troubleshooting relays in the mechatronic system</td>
</tr>
</tbody>
</table>
### Instructional Schedule (continued):

<table>
<thead>
<tr>
<th>Week</th>
<th>Sections</th>
<th>Topics</th>
<th>Chapters/Questions</th>
</tr>
</thead>
</table>
| 6    | 4,5      | Electrical fundamentals | Chapter 6 sections 1-4  
Combination parallel and series circuits. Voltage dividers  
Introduce indicators  
Section checkup questions  
Application of indicators and troubleshooting in the mechatronic system |
| 7    | 4,5,6    | Electrical fundamentals | Chapter 6 sections 5-9  
Wheatstone bridge and balancing bridges. Power applications  
Troubleshooting bridges  
Introduce solenoids  
Mid Term Exam  
Section checkup questions  
Application of solenoids in the mechatronic system. Troubleshooting techniques for solenoids |
| 8    | 6        | Electrical fundamentals | Chapter 7 sections 1 thru 5  
Electromagnetism, magnetic fields, induction  
Introduce switches and photoelectric sensors  
Section checkup questions  
Application of switches and photoelectric sensors in mechatronic system  
Application of troubleshooting techniques for switches and sensors |
| 9    | 6,7      | Electrical fundamentals | Chapter 7 sections 6 and 7  
Dc motors and generators  
Introduce capacitive sensors  
QUIZ 3  
Application of Capacitive sensors in the mechatronic system. Troubleshooting techniques for capacitive sensors |
| 10   | 6,7,8    | Electrical fundamentals | Chapter 8 sections 1-5  
Introduction to AC circuitry. Discussion on sine wave  
Instrumentation for measurement  
Section checkups  
Application of instrumentation for AC measurement |
| 11   | 6,7,8    | Electrical fundamentals | Chapter 8 sections 6-9  
AC motors, non-sinusoidal waveforms  
Introduce inductive sensors  
Section checkups  
Application of inductive sensors in the mechatronic system. Troubleshooting techniques for Inductive sensors |
