

Nashville State Community College
Associate of Science - Area of Emphasis: **Health Sciences - Transfer**

Because of the varying entry points for acceptance/entrance into baccalaureate nursing programs and the different structure of nursing curricula, community college students who wish to transfer to university programs are advised to follow a curriculum, as prescribed below, applicable to most university nursing majors.

Please note that the completion of a community-college curriculum and the subsequent courses taken at a university do not guarantee acceptance into a baccalaureate nursing program. Nursing is a highly competitive major, and only the most highly qualified students are admitted. The specific requirements for admission to university nursing programs may be found in the catalogs of the various universities. It is recommended that students review a programs' information prior to registering for classes to aid in transferability.

This sequence can be followed by students who begin in the fall semester. Prerequisites may apply to specific courses; it is the student's responsibility to determine if prerequisites have been met. Additional semesters will be required if prerequisite courses must be completed. Prior to registering each semester, the student is expected to consult with his/her advisor.
