

LEVEL II FIELDWORK GRADING POLICIES

Students must successfully complete two, eight week Level II Fieldwork experiences to graduate from the NSCC OTA Program. Successful completion is defined as the student receiving a passing score on the AOTA Fieldwork Performance Evaluation of the OTA Student.

If a student fails one Level II Fieldwork experience, the student will review performance with the Level II Fieldwork Coordinator. Each student must develop a plan for remediation that is accepted by the OTA Faculty. This plan must be deemed appropriate and all steps of plan must be completed prior to initiation of a placement search for another affiliation.

If a student fails two fieldwork experiences, they fail the program and are not granted a degree. Refer to your NSCC Student Manual for specifics on the appeal process.
