XP Operating System
DIAL-UP NETWORKING SET-UP
(REMOTE INTERNET ACCESS)

These instructions will show you the steps required to setup Windows XP built-in Dial-up Networking so that you may connect to Nashville Tech.

Creating a connection to Nashville Tech

Step 1
Click Start, right click on “My Network Places” then click properties

Step 2
Click “Create a new connection” A new windows will open, click next.

Step 3
In the next screen, select "Connect to the Internet" and click "Next"

Step 4
In the next screen, select "Set up my connection manually" and click "Next"

Step 5
Click “Connect using a dial-up modem” and click "Next"

Step 6
Next, enter the name “Nashville Tech” and click "Next"

Step 7
In this screen, enter the phone number: 345-2600 and click "Next"

Step 8
Then enter your dialup Username and Password, and click "Next"

- **Usernames**
  This is your CWID that is issued by Admissions or Records.

- **Password**
  This is your PIN that is issued by Admissions or Records.

Step 9
Click the “Add a shortcut to this connection to my desktop” box and click "Finish"

The result will be

![Shortcut to Nashville Tech](image-url)
This icon will be what you use to connect your computer to the Internet before you run any Internet Programs (e.g. Netscape or the Internet Explorer).

When you double-click on this icon you will get this window:

![Connect CMOSal window](image)

Click “Dial”

Your modem will dial and if all goes well proceed to ...Verifying Username and Password... ...Logging on to the network... ...then show you that you are connected, with a baud rate and duration in the corner of your start menu bar. This means you are successfully logged into Nashville Tech. You may now run your Internet programs (Netscape, Eudora, the Internet Explorer, etc.)

To run your Internet program, you can click on the Internet Explorer icon on your desktop or go to your start button, click on programs, click on whatever Internet program, you may have either Netscape or Internet Explorer.

**Troubleshooting Tips**

If you find that you are continually prompted for your name and password:

Passwords at NSCC are case sensitive. You will have to enter your password exactly as you created it.

- Check that the CAPS LOCK key is off so that you are NOT typing in all caps or vice versa if your password is all caps make sure you are typing in all caps

- Ensure that you are using your **CWID** and **PIN** in the correct Username, Password fields.
