Discovering Computers
Chapter 5

Review Questions

**Instructions:** You are encouraged to answer all review questions as this material will be covered on exams. Answers can be found in the Discovering Computers Chapter 1 text, the publisher’s Website, and the PowerPoint tutorials on my Website. **Required:** Select any five different questions and submit the question with a complete answer prepared on a word processor. *Be sure to label your printout properly.*

1. Define input.

2. What are the two most common input devices?

3. Describe the purposes for which the mouse and keyboard are primarily used.

4. List the six basic mouse operations.

5. List and describe the four areas of the keyboard.
6. Which key is known as the “cancel” key?

7. Which key on the keyboard removes the character to the right of the cursor?

8. Which key on the keyboard removes the character to the left of the cursor?

9. Describe the two types of voice input software.

10. What is audio input?

11. Describe direct source input.

12. List and describe five types of scanners.
