Learning Styles

Three Aspects of How People Learn
Three Elements of How People Learn

• How we perceive information.
• How we process information.
• How we organize information.
Perceiving Information

• Senses/sensation used in gathering information from the world around us:
  – Sight
  – Hearing
  – Reading/writing
  – Kinesthetic
Processing Information

• How do you grasp information?
  – Through abstract concepts and generalizations?
  – Through concrete, practical examples?

• How do you order information?
  – In logical, sequential, detailed way?
  – By looking at the big picture?

• How do you engage with information?
  – Through active experimentation?
  – Through reflective observation?
Organizing and Presenting Information (Sharing With Others)

• How do you organize information?
  – By looking at a holistic overview?
  – By making a detailed, logical analysis?

• How do you present information?
  – Verbally?
  – Graphically or pictorially?
