Steps to Transferring to Your 4-Year Institution

Here are some things you should do to prepare for a transition from NSCC to your next college of choice.

1. Go to the school website and join the mailing list. Click on the admissions tab and have the information sent to your permanent address.

2. Go to the NSCC website and find the transfer website link: http://www.nscc.edu/records/grades.html

3. Secure a current handbook and schedule book from NSCC and map out your schedule for the remaining time you are going to be here.

4. Seek an academic advisor at NSCC in your field of study to help you stay on track for the time you are at the school.

5. Set-up a monthly meeting with your professors to ensure you are staying on top of assignments in the class. Discuss progress with him/her during every meeting.

6. Go to your transfer school online and print out the transfer credit information if available.

7. Ask your transfer school about transcripts. Make sure you understand the cost associated with multiple copies and if the transcripts should be official versus student issued.
