

Enabling Lockdown Browser

Instructors of courses that are copied from a master course are responsible for ensuring that the LockDown Browser settings for applicable exams have been properly set. On occasion, these settings “break” during the copying process and require the individual course instructor to “fix” them.

At the start of each semester, instructors must complete the following instructions to ensure that students are able to access their exams:

1. Enter the course
2. Select “Evaluation” from the Navbar.
3. Select “Quizzes” from the dropdown menu.
4. Select the “LockDown Browser” tab.
5. Click any of the buttons that say “Fix it!” along the right side of the screen.
